SEPTEMBER 2003 TO JULY 2008

6 GCSE's including Science and English

PROFESSIONAL EXPERIENCE

Trainee Junior Data Engineer| Generation, Birmingham

AUGUST 2020 TO NOVEMBER 2020

I recently completed an intensive 12-week training program that aimed to provide me with the soft skillset and technical aptitude required in order to pursue a career within the field of data engineering. Through gaining valuable first-hand experience at applying programmatic concepts to real-world projects, I was exposed to various new technologies including Amazon Web Services, Shell Scripting and Snowflake. Through operating within a team, the program culminated with us having created a fully asynchronous pipeline capable of both cleaning and storing large volumes of data.

Business Support and Delivery Coordinator | Rico Logistics, Oldbury

JUNE 2015 TO OCTOBER 2016

Whilst working at Rico Logistics, I was responsible for organizing and overseeing various types of technical repairs, from PayPoint terminals to NCR self-service check outs. It was my duty to outline the appropriate processes and procedures necessary for ensuring an allocated engineer had completed their given task. Possessing excellent communication skills, alongside the ability to effectively function as part of a team, were fundamental in producing up to-date and accurate information within a timely manner.

Assistant Bar Supervisor | The Dog and Doublet, Wolverhampton

MAY 2014 TO JUNE 2015 & OCTOBER 2016 TO AUGUST 2017

The role of an assistant supervisor saw me continually providing exceptional service to customers by being friendly, knowledgeable and accommodating. Furthermore, I was responsible for overseeing my colleagues and took it upon myself to actively promote a cooperative and harmonious working environment in order to boost morale, productivity and efficiency.

Food and Beverage Assistant | Ramada Park Hall Hotel, Wolverhampton

OCTOBER 2013 TO MAY 2014

My line of work at the Ramada Hotel was mainly orientated around functions, these events meant that building guest satisfaction and customer enjoyment were of an imperative. My time at the Ramada Hotel furthered my ability to work well under pressure, during high-volume periods as I maintained a calm demeanour in order to ensure that bar operations were running smoothly.

TECHNICAL SKILLS

- **Databases:** Experienced with designing, creating and querying database solutions through utilizing Oracle Developer and MySQL.
- **Programming**: Core understanding of rudimentary coding principles with a good knowledge in object orientation. Familiar languages include Java, Python and PHP.
- **Networking**: Adept knowledge of the components which form both corporate and domestic networks with a strong grasp on routing concepts and protocols.
- **Web Development:** Competent in building dynamic websites. Skillful in the use of HTML, CSS and Bootstrap.
- **Project Management:** Having achieved my Agile Foundation certificate, I possess a strong fundamental knowledge of Agile methodologies.

PROFESSIONAL MEMBERSHIPS

- Member of the British Computer Society
- Member of the Agile Business Consortium
